

DISNEYLAND PARIS HEALTH PASS COMMUNICATION AND Q&A – EFFECTIVE 21 JULY 2021

As per the French government's announcements, a health pass will be required for guests aged 18 and older to visit Disneyland Paris as of July 21. Guests will need to hold a valid health pass during the entire duration of their stay from that date and to have a valid ID that they will need to present with their health pass.

Please visit the Health and Safety page <https://www.disneylandparis.com/en-gb/health-safety-measures/> for:

- Information on what a health pass is
- Details of the on-site testing facility managed by a third party, available for guests who may need to be tested (PCR or antigen) upon arrival, during their stay or prior to return to their home country

You can also check www.disneylandparis.com for the latest updates. Due to a very high volume of calls, you may experience longer delays than usual when trying get in touch.

Health Pass FAQs

What is the health pass that will be required to visit Disneyland Paris?

According to information available from the French government as of the issue date of this page, the health pass must be presented, in digital or paper format, to verify one of three things:

- That a guest is fully vaccinated (with an EMA-approved vaccine):
 - Two weeks after the second shot for two-shot vaccines (Pfizer, Moderna, AstraZeneca);
 - Four weeks after the shot for one-shot vaccines (Johnson & Johnson);
 - Two weeks after the shot for vaccines administered to people who have already had COVID-19 (only one dose is necessary).
- OR that a guest has been tested (PCR or antigen) with a negative result within the last 48hrs;
- OR for persons who have had Covid-19: the result of a positive RT-PCR or antigenic test attesting that individual HAS been infected, and that a period of time of at least 11 days and less than 6 months HAS passed since the test result was obtained (considered as recovery certificate)

Guests can present any form of health pass– including the EU digital COVID certificate or equivalent for non-European Union countries – which fulfills the criteria outlined above.

For more information on the health pass including the latest updates, we invite you to visit the French government website

Guests will need to present a valid ID with their health pass.

What are the accepted vaccination requirements to validate the health pass?

As of 15 July, a person is considered vaccinated if they have a complete vaccination schedule and the necessary time after final injection, that is:

- 2 weeks after the 2nd injection for double injection vaccines (Pfizer, Moderna, AstraZeneca);

- 4 weeks after injection for single-injection vaccines (Janssen Johnson & Johnson);
- 2 weeks after injection for vaccines in people with a history of Covid (single injection)

Who needs a health pass to access Disneyland Paris?

According to information available from the French government as of 21 July, all adults ages 18 and older will need to show a health pass in order to access Disneyland Paris. As of 30 August, this requirement will also apply to guests ages 12 to 17. Children under the age of 12 are not affected by this measure.

How do I get into Disneyland Paris if I have not been vaccinated?

If you have not completed an entire vaccination schedule, you can access Disneyland Paris upon presentation of one of the following two items:

- negative RT-PCR or antigenic test less than 48 hours old;
- OR for persons who have had Covid-19: the result of a positive RT-PCR or antigenic test attesting that individual had been infected, and that a period of time of at least 11 days and less than 6 months had passed since the test result was obtained (considered as recovery certificate)

You will need to present a valid ID with your health pass.

A testing center is available in Disney Village and operates from 8am to 8pm, 7 days a week. It is equipped and managed by an independent provider, Loxamed, registered by the French Health authority which operates the site autonomously.

Costs are defined by the independent provider, Loxamed as follow (all costs indicated are per test and per person):

PCR Tests (24-hour results):

- o Persons with a valid French social security number: €20.00 (administrative cost)
- o Persons without a valid French social security number: € 63.89 (administrative costs + €43.89)

Antigen tests (with results usually delivered in 15 minutes):

- o Persons with a valid French social security number: €20.00 (administrative cost)
- o Persons without a valid French social security number: € 45.01 (administrative cost + €25.01) 3

How many days does a negative PCR test last? Will I need to be tested multiple times if I am staying more than 2 nights at the resort?

Per French government rules, a negative PCR or Antigen test is valid for 48 hours. If your stay extends beyond this 48-hour validity period, you will be required to take another test / other tests to have a valid health pass for the whole duration of your stay.
